LIFT & TURN

The intersection of
Elegance and Efficiency

Operator that solves problems
incline drive ways,
curb, landscape
and uneven drive ways

The operator that lifts 11”
as it turns 90 degrees
Snow and Ice become
less of a problem

All major components
are made of aluminum
corrosion is a thing
of the past

Residential
&
Light Commercial

The VERTICAL sleek profile
blends with any gate
available in Single
or Master slave

Onsite adjustable swing
from 75 to 105 degrees

24 VDC
Solar Capable

- White backlit 2 line-20 character display
- Programmable 7-day open timer w/ 4 available time slots
- Programmable 7-day secured input Timer w/ 2 time slots
- 2 programmable auxiliary output 15 amp relays
- 1 programmable auxiliary input terminal
- Built in cycle counter with available maintenance counter (days or cycles)
- 12/24 VDC power available
- Built in 2 motor diagnostic (displays selected motor's running amperage/voltage)
- Programmable maximum run timer and automatic closing timer
- Programmable low power action
- Available password protected menu
- Available open/close limit secured feature (fail secure option)
- Adjustable soft stop/start position
- Electronically controlled and adjustable limits
- 255 event fault log memory that is displayed on the LCD Screen
- Built in thermostat
- De-icing Mode that is programmable for desired low temperatures and many more features

Power requirements 115/220 volt
Motor 24-vdc drive-ball screw actuator
continuous operational capacity of
250 pounds for a 14 ft leaf gate
Control box -surface mounted weather sealed
Battery backup systems built-in

24-vdc 6000 rpm motor sealed
20:1 reduction standard brake
Inline Positioning Actuator
